17 - THE COURSE: Please comment on course content, requirement or any other aspect of the course.

Response Rate	4/8 (50%)
<ul style="list-style-type: none">• Overall I had learned a good deal over the duration of the course. It was stunted at first due to technical issues with the tools they were having us use, but after overcoming this by using what was used in previous semesters we were able to progress further.• The hiccups with Podman at the beginning of the semester put a serious damper on the project. I think we should have abandoned Podman much sooner than we did, and I hope there is a better solution for next year's class.• This course was extremely intense, especially in lieu of Covid. This is by nature, but sometimes it felt like an uphill battle trying to complete my work in this class. Both students and professors were both having technical difficulties, which put a great pressure on both sides. That being said, the pressure allowed us to continue what we were supposed to do during class pre-covid.• This was a very tough course. But I learned a great deal from it as well, despite all the trouble I had with learning new tools. Actually working on software and using scrum techniques was a lot of fun for me.	

18 - THE INSTRUCTOR: Please comment on the strengths and weaknesses of Laura Grabowski. Would you take another course from this instructor? -

Response Rate	4/8 (50%)
<ul style="list-style-type: none">• As far as a professor, Dr. Grabowski is incredibly competent in her field. She is a very patient and understanding person, but also firm when she needs to be. I would gladly take another course from her.• All in all, an excellent approach to adjusting the class for distance learning. I think that this semester went as well as possible, in the given circumstances.• Dr. Grabowski can hold students to a very high standard, sometimes one (especially in the difficulties we have faced this semester) that can seem unrealistic. This was frustrating, but I also appreciated that this is something we will be encountering in the real world, and out professors solely aim to prepare us for that. In terms of the Agile process, Dr. Grabowski is very competent in the material and subject.• I would love to take another course that your teaching.
