17 - THE COURSE: Please comment on course content, requirement or any other aspect of the course.

Response Rate	1/12 (8.33%)

• Online exams are so hard time wise having to be either hand written and scanned or typed up, considering the symbols this course uses coming in. Felt the exams were maybe just a little overweighed with material to do

17 - THE COURSE: Please comment on course content, requirement or any other aspect of the course.

Response Rate	4/14 (28.57%)

• I liked that we brought in critical thinking and honestly enjoyed leaving class pondering different ethical questions. I also really enjoyed some of the solutions and discussions others had throughout the course.

• All material being easily accessible is helpful. Not a fan of doing recordings of presentations but I understand given the unpredictability of technology.

• Learning how to be a computer scientist who is always willing to apply professional ethics is what this course is all about. I did learn things I was not aware of before taking this class, especially how bias our algorithms can really be.

• I think that this course is really interesting and useful. I enjoyed the discussion and I feel like I became a much better presenter because of it. At times, I felt like we had covered really similar material several times. I wish we had branched out into more varied areas of computer science. Ethics applies to all of computer science, but it seems like we really only talked about A.I. related topics. What about research ethics, or the ethical dilemmas of hacking? I understand we are somewhat at the liberty of what is available, and what is abundantly available is A.I. ethical problems, but I guess it's just something to think about. I also think that the number of evaluations was not necessarily productive. I feel like I got and gave a lot of similar feedback repeatedly. Maybe cutting it down to 2 instead of 3 would minimize this.

---

18 - THE INSTRUCTOR: Please comment on the strengths and weaknesses of Laura Grabowski. Would you take another course from this instructor? -

Response Rate	3/14 (21.43%)

• Dr. Grabowski shows a great understanding and love for the subject. I always look forward to having her classes.

• Graboswki is always available for her students, she is happy to answer questions, and help her students out the best she can when they are in need. The roadwork for this course is heavy enough, but all the work we did was of relevance and quite frankly, enjoyable. I don't think Grabowski believes in perfect scores, but I think that is due to the fact that her standards are high, which in all honesty is a good thing, as it keeps us motivated to thrive and do better. All of our discussions were of interest, the material we covered was up to date, thus now we are well informed. Overall, the work and the deadlines, I think, were already preparing us as early career computer scientists to go and work in the real world. I would definitely take another class with Graboski.

• I thoroughly enjoyed this course. The discussion prompts were very thought provoking and our discussions were well moderated. I think the best part of this course is the fact that you can absolutely tell how passionate Dr. Grabowski is about this topic and teaching in general. She cares, which makes me care. I don't think that the virtual nature of this class took away from its value at all, and that is due to the way it was designed. Pre-recorded presentations is not the first method I would think of to adapt this class, but it really worked. Dr. Grabowski is understanding of student's situations and very flexible. All-in-all, a fantastic professor. 10/10, would take again.
